Athenahealth is a major healthcare technology company that is dedicated to improving the quality and accessibility of healthcare. Its platform is designed to be seamless and secure, enabling providers to easily and effectively manage patient data and improve patient care.

In 2022 KLAS research, Athenahealth was rated #1 for EHR and practice management.

However, at the same time, Athenahealth is acutely aware of the importance of protecting patient data. The company employs rigorous security measures to ensure that patient information is only accessible by authorized individuals. This includes encryption of data, secure user authentication, and regular security audits.

That's where AuthX comes into play.

AuthX is a leading Identity and Access Management platform providing an additional layer of security for online applications and services. Our platform supports a variety of authentication methods, including **biometrics, mobile authentications, and Tap-&-Go RFID solutions.**

Additionally, AuthX is designed to be easy to use and easy to integrate with existing systems, making it an ideal solution for healthcare organizations looking to improve their security without disrupting existing workflows.

The Power of AuthX and Athenahealth Integration

Transforming Healthcare through Secure Data Management: An Overview of AuthX and Athenahealth Partnership

Securely Connecting Healthcare:
The AuthX and Athenahealth Revolution

Athenahealth and AuthX are two powerful tools that help healthcare organizations improve their security and user experience. Together, Athenahealth and AuthX offer healthcare organizations to protect sensitive patient data, improve access to care, and enhance the overall user and patient's experience.

Empowering healthcare providers: The partnership aims to empower healthcare providers with the tools and data they need to deliver high-quality care and improve patient outcomes.

Improved patient experience: By providing a unified view of patient data, the partnership aims to improve the overall patient experience by reducing duplicative tests and improving the quality of care.

Integration of patient data: AuthX and Athenahealth partnership aims to integrate patient data from various sources and make it accessible to healthcare providers in a secure and streamlined manner.

Ever since last year's worrisome numbers on data breaches and social engineering, healthcare facilities are now opting for secure authentication platforms to keep hackers at bay.

66% of data breaches involve stolen passwords, phishing & ransomware attacks.

So, in order to provide organizations with a complete solution in healthcare, AuthX and Athenahealth are both working together to help streamline operations, improve patient care, and increase revenue.

Athenahealth and AuthX are working together to create a healthcare system that is patient-centered and efficient. The goal is to enable patients to move seamlessly between healthcare providers, with their data securely transferred and accurately shared across the system.

With AuthX, the data-sharing capabilities will help reduce medical errors and improve the overall patient experience. Ultimately, this collaboration creates a future where patients have access to the best possible healthcare, without the hassle of dealing with multiple records.
